

## Everything Ready for Coleman's Big Sports Day, July 1---Let's Go!

### Sports and Carnival Committee Have The Stage All Set to Give The Big Crowd of Pleasure Seekers the Time of Their Life

All arrangements have now been completed for the big sports day celebration on July 1st, and the Carnival in the Arena in the evenings of the 1st, 2nd and 3rd, at Coleman.

Commencing with the monster parade of children at 9.15 a. m.,—when all children able to walk will parade to the sports grounds and receive 20c and a Union Jack in commemoration of our Dominion's natal day and the local Elk's flag day,---there will not be a dull moment until 6 p. m., when the long list of athletic events will be concluded. After an hour's respite the big crowd will journey to the Arena when the evening's fun will commence and continue until midnight.

The Coleman Town Band together with the McGillivray Pipe Band have been engaged for the entire day, while the Imperial Radio Orchestra of Calgary will function in the evenings at the Arena, so there will be a wealth and variety of music to suit all tastes on this occasion.

Competition for the splendid prizes being offered by the Crow's Nest Pass First Aid Association, promises to be exceptionally keen, and should prove to be one of the most interesting events of the big day's program. The prizes to be awarded are now on display in Ouimette's Men's Wear store window.

The Calgary "Brewers" will arrive on the passenger on Thursday morning bright and early ready to play the game of their lives against the Coleman Miners. This game should prove to be the best exhibition of football to be seen on local grounds this year.

Besides the main senior football event between Calgary "Brewers" and the Coleman "Miners," there will be several good games between junior teams representing Hillcrest, Blairmore and Coleman, so that soccer fans will more than get their moneys worth at Coleman on July 1st.

Some fast, snappy baseball has been lined up for all those who follow this pastime. Hillcrest, Blairmore and Coleman will play and this will assure the fans of witnessing two good baseball games, one starting at 10 a. m. and the other at 1 p. m.

Italian hand ball and quoiting are also creating considerable interest and strong teams are expected to compete in these events from Michel, Hillcrest, Bellevue, Blairmore and Coleman.

Arrangements are well in hand to decorate the business section with flags and bunting and all are asked to co operate in dressing up Coleman in gala attire.

Those in charge of the Carnival end of the big day have everything in readiness for the record-breaking crowds during the evening and following days July 2nd and 3rd. The huge new dance floor will no doubt be thronged each evening with hundreds of dancers tripping the light fantastic to music supplied by one of Calgary's most famous orchestras.

The booths this year will be more numerous and carry a more varied range of premiums than was the case last year. Everything from Indian Blankets to gold fish have been procured in large quantities and there is no danger of the supply running short.

Prizes will be awarded each evening to the holder of the lucky number ticket. On Saturday night the grand prizes, a fully equipped Ford Touring Car and a Good Housekeeper Electric Washing Machine will be given away to holders of the lucky numbers.

#### THE MAIL BAG

St. Alban's Rectory,  
Coleman, Alta.  
June 24th, 1926

To the people of Coleman:—

Please accept my thanks for the help rendered by your attendance and support at the Red Cross Demonstration on Sunday, June 20.

A report, with the account of a amounts collected, will be found in The Journal this week.

Again thanking you, I remain,

Yours sincerely,

H. Laurence Nobbe,  
Convener  
for Canadian Red Cross Society.

### Price of Milk Goes Down!

The grass is here and so long as there is pasture the

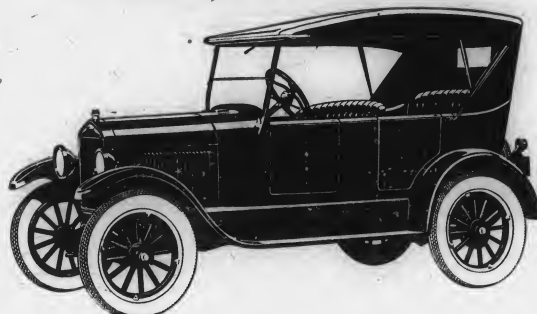

#### Dependable Dairy

will sell milk, commencing July 1st, at

9 Quarts for One Dollar

STRICTLY CASH

### This Splendid Car Being Given Away For \$1.00!

On Saturday night of this week the above car will find a home, some lucky individual will get it. If you want to be among those who have a chance of being the lucky person, remember you must purchase a ticket this week, next week will be too late. A chance costs you the small sum of \$1. Buy one NOW and get in the swim for the Swimming Pool.

#### Business Firms Contribute For Music on July 1st

The following business firms in town who benefit directly from a sports day have donated the undermentioned amounts towards paying the expenses of the Town and Pipe Bands on July 1st:—

Empire Hotel	\$25.00
Leaky, Ledieu & Co.	10.00
B. C. Cafe	10.00
C. L. Goody	2.00
Coleman Hotel	25.00
Coleman Journal	5.00
Lethbridge Brewery	25.00
Coleman Cafe	20.00
Grand Union Hotel	25.00
Dan Krokosh, Sweet Shop	3.00
Palm Confectionery	5.00
International Coal & Coke Co., Ltd.	5.00
	\$155.00

#### Monthly Meeting of W. I.

A regular meeting of the Women's Institute was held at the home of Mrs. Rolt. Evans on Wednesday evening, June 23rd, with fourteen members present.

All arrangements were made for a Millinery course to be held from July 9th to 12th.

On motion it was agreed to assist with funds for gymnasium now under consideration by the town authorities.

Mrs. Arthur Graham gave a very interesting report on the Annual Convention in Calgary at which she was the local delegate.

The ladies volunteered to assist with the catering at the Carnival on Saturday night, July 3rd, with aid from the L. O. B. A.

Our next meeting will not be held until September unless further notice is given.

#### Cubs Win Over Hillcrest

In a league game in the Crow Baseball league between Coleman and Hillcrest on the local diamond Friday last, the Coleman Cubs secured an easy win by 14-8 over the visitors. With the exception of one innings good ball was played by both teams. The Cubs again proved they have a very snappy lot of players on their roster this year.

#### Financial Statement of Red Cross Drive

Below will be found a statement of the receipts and expenditures accruing from the recent Red Cross drive and demonstration. The amounts in the boxes were checked over by the officers of the local Red Cross Society, Mrs. A. W. H. McLeod, President; Mrs. O. E. S. Whiteside, Vice-President, and Mrs. C. F. Dunlop, Secretary-Treasurer, who desire to thank all who helped to make this undertaking such a success.

#### Farmer Government Retains Reins of Power

Monday's provincial elections saw the return of the Farmer government with practically the same representation as they secured five years ago. Alex Ross, the Labor member of the cabinet, was the only minister of the government to go down to defeat.

The Liberals did not strengthen their position in the legislature and when the final returns are complete may lose a seat or two. The Conservatives made a slight gain, increasing their representation in the house from 1 seat to 3.

The standing of the parties on Tuesday is as follows:—

Party	Elected	Leading but in doubt
U. F. A.	37	4
Liberal	4	6
Conservatives	3	0
Labor	3	1
Independent	1	1
Total, 60.		

P. M. Christophers, Labor candidate in Rocky Mountain had a comparatively easy win over his Liberal and Conservative opponent in one of the most quiet election campaigns ever held. Personalities were not injected into the fight locally.

The whole campaign was conducted on a very high plane and the three candidates and their supporters are to be commended for this gentlemanly conduct.

Following is the vote recorded at each of the polls in the riding:—

	Christophers	Denmore	Kerr
E. Coleman	838	37	42
W. Coleman	126	3	18
C. Coleman	106	36	39
Carbondale	22	32	5
McLarens Mill	10	31	1
Blairmore	518	108	82
Frank	54	11	20
Bellevue	243	75	115
Hillcrest	117	41	109
Passburg	13	2	21
Burns	9	19	8

(Continued on Page Eight)

### T. T. Burns Gets Nice 2 lb Speckled Trout

Four Coleman fishermen, Messrs. Dan McFarlane, J. McCulloch, J. Barclay and T. T. Burns had a very successful fishing trip to the North Fork over the week end. J. McCulloch got 9 beauties sufficient to fill his basket, while T. T. Burns caught 8 of the finny monsters, one of which tipped the scales cleaned at 1 lb 14 ounces.

The party report the river high and the water badly discolored and state that it will be at least a couple of weeks before fishing there will be at its best.

### The Journal's Attitude on Teachers Salary Question

Owing to the fact that certain interested parties have made it their business to disseminate false information as to just where The Journal stands on the question of school teachers' salaries, we find it necessary to again refer to this matter. We have never advocated "cheap labor" in our schools or in any other line of endeavor. The article appearing in this paper on May 6th under the heading of "Zig Zag Logic Used by Trustees" did not advocate grinding the teacher down, as the following paragraph taken from the article in question plainly demonstrates:—

"Efficiency in our schools, as in all other walks of life, is a very commendable thing to strive for, and naturally the more efficient one becomes in their particular life pursuit the greater should be their remuneration. The Journal, along with many taxpayers, are in accord with this contention."

The point made in the article of May 6th was that the Board's efficiency argument did not hold water as they hired inexperienced teachers who had yet to prove their efficiency, paying them the highest salaries in the province into the bargain—a statement, by the way, which has yet to be proved incorrect. The Journal was fully aware that in a few instances some rural schools where a teacher has to teach a half dozen different grades, receives as much as we pay inexperienced teachers in Coleman, but in the former case, the instructor certainly deserves all he or she receives, as it entails far more work and greater efficiency than is required of a junior teacher in a graded school.

Our position with regard to hiring local teachers has also been misrepresented. Other things being equal we favor giving local teachers preference, although we are well aware that this policy is opposed in many places, but what we do object to is the present policy of having relatives of the teachers on the Board of Trustees.

The Journal contends that the salary of inexperienced teachers is altogether out of proportion to that paid in other parts of the province, and it would be in the best interests of all concerned—teachers, scholars and taxpayers—if the Board set a lower minimum, and then gave a yearly advance to those teachers who proved themselves efficient.

Aside from the teachers' salary question, we believe that a considerable saving could be made in the general administration of our school affairs, and thus bring a measure of relief to the hard pressed taxpayers of the district, most of whom have of recent years had their earning power considerably reduced.

## TRADE MARK YOUR MEAT

Oatmeal was just plain oatmeal until some bright mind produced a superior grade in an attractive package, gave it a name and sold it for a higher price. Apply this sound selling policy to your business by using Appleford San Wraps. They "trade-mark" your meat, protect its flavour and advertise your name and selling message.

Write to-day for full information and prices.

## Agricultural Wealth Of The Prairies

In this year when the twin Provinces of Alberta and Saskatchewan will celebrate their coming of age as autonomous units in the Canadian Confederation, it is not only interesting but appropriate to note the truly amazing progress made by Western Canada in a space of time so brief as to be considered but a passing moment in the life of a nation. When the West was first opened to settlement with the advent of the C.P.R., predictions were made that a great future awaited it, and these were renewed when twenty-one years ago the Old North West Territories passed and the Provinces of Saskatchewan and Alberta came into being. But even the most optimistic could hardly foresee such growth as has actually been recorded.

Twenty-one years ago Manitoba had a population of about 300,000, and in creating the two new Provinces they were each credited with an estimated population of 250,000. As a matter of fact the census the following year disclosed a much smaller figure. Compared with less than 700,000 population in the three prairie provinces in 1905, it is confidently predicted that this year's census will show a population of approximately two and one-half millions.

According to a recent estimate by the Dominion Bureau of Statistics, the gross agricultural wealth of Canada in 1925 was \$7,832,942,000, almost one-half of which was credited to Manitoba, Saskatchewan and Alberta. Almost the youngest of all the provinces Saskatchewan occupies second place in gross agricultural wealth, being exceeded by Ontario only, while Alberta and Manitoba occupy fourth and fifth places respectively. The gross agricultural wealth of Saskatchewan was placed at \$1,828,832,000, Alberta at \$1,092,187,000, and Manitoba at \$686,495,000. These are remarkable figures for such a young country, still in the initial stage of its development.

In annual agricultural revenue the strong position held by Western Canada is even more strikingly indicated. In land values, and in the value of farm buildings the older and more populous provinces of Ontario and Quebec naturally outrank the West, but in the annual value of agricultural production the Western Provinces take a high place. The total agricultural revenue of Canada in 1925 was placed at \$178,867,000, of which the three prairie provinces produced \$59,720,000, Saskatchewan being credited with \$14,602,000, or only \$51,000,000 less than Ontario; Alberta with \$15,692,000, and Manitoba \$12,046,000.

In field crops, Saskatchewan comes first with Ontario second, Alberta third and Manitoba fourth. Ontario and Quebec lead in farm animals with Saskatchewan third. Alberta is fourth in the production of wool, while Saskatchewan occupies third place in the production of honey. The Western Provinces are out of the running in the production of fruits and vegetables, lead being in these lines belonging to Ontario followed by British Columbia, Quebec and Nova Scotia in the order named.

Considering the fact that the new twin provinces of the West were not quite nine years old when the Great War broke, and the unsettled and difficult years which have since intervened, the progress of the West must be regarded as altogether remarkable. It speaks volumes for the capacity of the country itself and the capabilities and energies of the people, while giving promise of a growth, development and prosperity within the next decade or two unsurpassed in all the past history of the Dominion.

There has been a consistent rise in agricultural revenue since 1921 following the unprecedented high war prices of 1918, 1919 and 1920. Equally gratifying is the definite tendency towards a greater diversity of crops. No longer is it possible to count on Canadian agricultural revenue under the two headings of field crops and livestock. Dairy products, poultry and eggs, honey, fur farming and other pursuits now represent a respectable sum in the total of the Dominion's annual production of wealth.

One year hence Canadians will celebrate the diamond jubilee of Confederation. The Dominion is moving forward to observance of that anniversary with ever increasing confidence and pride in the country under conditions of expanding trade, increased development of natural resources, greater industrial activity, marked advances in production along many lines, and particularly in agriculture and allied pursuits, a growing population, and increased financial power and general prosperity.

The Western Dominion is just beginning to make their contribution to the growth and prosperity of the Dominion. No section of the Dominion will have a greater contribution to make in the years immediately ahead, and not in material things alone will that contribution be made, but in leadership in all things which make a people truly great, in statesmanship, in the arts and sciences, in the world of religion and social service. The record of the past two decades is but the promise of the future.

### Is Considerate Of Police

French Prisoners Do Not Keep

Gendarmes Out Late

When President Bonaparte, of France, in at the presidential summer residence at Rambouillet he declined all invitations which keep him away from the chateau in the evening. "You see," said the president in explanation, "when I have to decline an invitation, when I leave Rambouillet after dark the gendarmes all along my route are called out and are not allowed to go to bed until I am back home again. So I prefer not to go out. It is I who calls them out. It is a far more influential person than the president, and over whom, alas, I have no power. It is the Prefect of Police."

### Stiff Joints

and sore muscles are quickly relieved by a few applications of Minard's

**MINARD'S**  
"KING OF PAIN"  
LINIMENT

W. N. U. 1935

### Weather Not Cause Of Colds

Over Fatigue Exposes System To Ever-

Present Germs

The time-honored notion that colds are for the most part caused by inclement weather is ridiculed in a bulletin issued by the United States public health service.

Cold in the head, says the bulletin, is unquestionably the consequence of over-fatigue, which induces the system to the bacilli that float constantly about.

The majority of colds are "caught" during the months when little outdoor exercise is taken. It is not cold or damp air which causes the (technical word for the ailment), but the substitution of stale air for fresh.—Detroit Free Press.

### Better C.N.R. Earnings

The gross earnings of the Canadian

National Railways for the week ended June 7, 1936, were \$5,045,860, as compared with \$4,029,141 over the same week of 1935, an increase of \$1,016,719, or 25 per cent.

Horses in England are decreasing in number at a rate of nearly 70,000 a year.

"So the shark took your leg?"

"Yes, but I wanted a new one, anyhow, the old one was too short."

## Industrial Research

National Council of Women Advocates Retention of Trained Men and Women

A report prepared by Mrs. Ora Mackay, of Montreal, for the committee on immigration and colonization, was read by Mrs. Charles Thorburn at the National Council of Women conference held at Vancouver. The report pointed out that statistics showed that the universities of British Columbia, Saskatchewan, Alberta, Quebec and Dalhousie alone have contributed to the United States in less than ten years.

It was resolved that the National Council of Women endorse the proposed legislation as taken from the speech before the throne, regarding the matter of an industrial research organization, and to petition the government to subsidize the said organization for a period of years with the view of retaining the trained technical men and women to build up the nation.

## Swollen Joints, Quickly Limbered Up

### Rub On Nerviline

You would be surprised at the wonderful action of "Nerviline" in just such cases. Being thin and not an ankylosis, it is able to penetrate deep, and down it sinks into the tissues, carrying its healing, soothing action wherever it goes. For stopping muscular or nerve pain, for easing a stiff joint, Nerviline is a complete success. Pain, soreness, stiffness, all vanish before the magic power of this wonderful liniment. Nearly fifty years of successful experience with Nerviline, which is sold everywhere in large 35 cent bottles.

### The Decline In Democracy

Representative Government Would

Appear To Be In Serious

Danger

It is becoming more and more evident that representative government is in very serious danger. It has been destroyed to all intents and purposes in Italy, in Spain, in Russia and in Greece; both in France and Germany its future cannot be regarded as entirely confident; and even in this country and the United States anti-democratic forces have manifestly increased and multiplied since the war.—London Daily News.

Wise and experienced mothers know when their children are troubled with worms and are in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system and in restoring those healthy conditions without which there can be no comfort for the child, or hope of a healthy future. It is a most trustworthy worm exterminator.

### Says Plants Have Brains

Noted Indian Physiologist Has Con-

ducted Many Experiments

Sir Jagjits Chandra Bose, the noted Indian plant physiologist, has perfected a device that he says, accurately measures the nervous impulses of a plant's fibres. He contends that vegetables feel, react and almost think in the same way as animals, but to a lesser degree. As a result of his experiments, Sir Jagjits asserts, he has become convinced that plants have brains, and that their thought processes can be ascertained.

Time Has Tested It—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved its worth to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

### Imports More Cream

The United States doubled importations of Canadian cream and fresh milk during May as compared with the previous month.

According to a report just issued by the Dominion Bureau of statistics, 341,009 gallons of cream, worth \$580,810, were exported to the United States as against 153,900 gallons (valued at \$252,810 in April).

### Grafts On Eyes

Slight has been restored or created

in certain animals by the grafting of

eyes, according to a recent experiment by Prof. R. Gwynne, of the University of Geneva. The subjects were tritons, a species of aquatic salamander. Out of 84 cases, three successes were reported.

### Carmaney Was Delayed

A new victory is always sworn in

on an ally in India, by the Lord Chief Justice of Bombay. When Lord Reading was sworn in an amusing incident occurred. A new statement only was provided, so that the proceedings had to be adjourned while an Old Testament was fetched.

### Carmaney Was Delayed

### Canadian Weekly Newspaper Association

Officers are Elected at Annual Con-

vention Held in Quebec

The annual convention of the Canadian Weekly Newspaper Association was held recently in Quebec. Officers for the coming year were elected as follows:

President, J. A. MacLaren, of the Examiner, Barrie, Ont.

First vice-president, W. S. Wynn, of the Enterprise, Yorkton, Sask.

Second vice-president, S. Ainslow, of the Graphic, Campbellton, N.B.

The following were elected as directors of the association: Hugh Savage, Leader, Duncan, B.C.; R. E. White, Sentinel, Kamloops, B.C.; H. C. McCrene, Herald, Hannah, Alta.; L. D. Nesbit, Mail, Haines, B.C.; James McDonald, Courier, Unity, Sask.; S. J. Dorman, Despatch, Alameda, Sask.; D. C. Dunbar, Mercury, Estevan, Sask.

### Boy War Veteran Dies

Youngest Member of Austrian

Imperial Forces Was Great

Sufferer

Porty operations in eight years failed to save the life of Bernard Haynes, wounded war veteran, because he enlisted in the Australian Imperial force at the age of 14 and thus became the youngest Australian to go on active service. Haynes became "Baby" to his comrades because of his youth.

A German sailor burst near him at Bapume in July, 1917, and from that date until his death recently, Haynes was never off his back. For eight years the ablest surgeons in Melbourne and London tried to save him, but he died at the age of 20.

Has Spent Thirty Years in Exploring Most of America's Work Done Around North Pole In two months' time Amundsen will celebrate his 54th birthday and he can look back on a record of exploration at both ends of the earth, to which he has devoted 20 years of his life, and which has added enormously to our knowledge of the Arctic and Antarctic. Most of his life's work has been done around the North Pole, where 20 years ago he led the first expedition to conquer the Northwest Passage. In 1911 he conquered the South Pole, and now he has surveyed hundreds of thousands of square miles of the unknown Arctic, a task accomplished in three days, which, but for the conquest of the air, he was prepared to undertake by drifting with the Polar current in the Fram for as many years.

### Brother Had a Handicap

"Why do you always insist upon

having the largest piece of pie, Harry?" asked the mother reproachfully.

"Isn't your big brother entitled to it?"

"No," said Harry; "he was eating

pie three years before I was born."

### Answer to the Child's Prayers

Eczema on Head Itched

Badly. Cuticura Healed.

"Eczema broke out in pimples on my little boy's head and in bed he scratched and scratched causing sore eruptions. Her hair fell out and she was very fretful. We had to tie her hands to keep her from scratching, and she would not sleep. We had her used but the trouble kept getting worse."

"We began using Cuticura Soap and Ointment and in a short time could see an improvement. We continued the treatment and in less than six weeks she was healed."

—Mrs. A. A. Wood, 706 North Main Ave., Winnipeg, Man.

Cuticura Talcum is cooling, soothing and comforting to tender skin. It is the best.

Sample Size Free by Mail. Address: Cuticura, P.O. Box 1024, St. Paul, Minn.

Get Cuticura at your drug store or by mail from Cuticura, P.O. Box 1024, St. Paul, Minn.

## Says Water Will Replace Gasoline

Paris Scientist Working On Discovery For Auto Fuel

The town pump is coming back to business. A Paris scientist is working out a discovery which, it can be applied, promises to revolutionize economic production for the world. According to the professor, it is a mere matter of time and a question of making the necessary calculations in order to catalyze water and build a water-driven internal combustion engine, or to catalyze any other body to transform the forces produced into energy-driven, productive machinery.

"We shall catalyze water," he says, "and you will have automobiles driven by hydrogen engines. That is a matter of time to establish plans. As soon as calculations are made to substitute water for gasoline, France will be freed from foreign bondage for her motive power. Preliminary formulae must be established. They will revolutionize modern industry."

Kingston British Whig.

## DELICATE GIRLS NEED NEW BLOOD

Which Can Be Had Through the Use of Dr. Williams' Pink Pills

Nature intended every girl to be happy, active and healthy. Yet too many of them find their lives saddened by suffering—nearly always because their blood is thin and pale. All those with colorless cheeks, full and lusterless eyes, are in this condition because they have not enough red blood in their veins to keep them bright and in the charm of health. It is a few of the minerals of blood, and periodical headaches. Dark lines under their eyes, their heart palpitates after the slightest exertion, and they are often attacked with fainting spells. These are only a few of the ill-effects of bloodlessness. When the blood becomes thin and watery it can be enriched through the use of Dr. Williams' Pink Pills and the troubles that come from poor blood disappear. In almost every neighborhood you will find some formerly ailing girl who has a good word to say for this medicine. Among them is Miss Ida M. Withrow, Hawk Woods, N.S., who says:—"Dr. Williams' Pink Pills did more for me than all the other medicine I took, and cannot praise them too highly. When I began to use these pills I was in a terribly low down condition, very thin and very pale. My appetite failed, and I had a tired, worn-out feeling all the time. My doctor did not seem to improve my condition, and I was getting greatly discouraged when a friend advised me to try Dr. Williams' Pink Pills. A trial of these pills was all I needed. After taking six boxes I felt like a new color, and my improved appetite, and the constantly tired feeling that had taken a few boxes more before I stopped. By that time I had never felt well in my life. I shall always be grateful to Dr. Williams' Pink Pills and strongly recommend them to all who are in need of them."

You can get these pills from your druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Oxford Professor Self-Taught

Started Work in Stone Quarry At Age Of Six

In "John O'London's Weekly," Dr. Joseph Wright, M.A., tells the amazing story of his rise from donkey-boy in a Yorkshire quarry to Professor of Comparative Philology (science of language) at the University of Oxford, a position he has just resigned. At six he went to work in the quarry. He taught himself to read and write, and at 20 became a sort of schoolmaster. Later he taught himself Sanskrit, Latin, Greek, French, German, Gothic, Old Bulgarian, Lithuanian, Old Norse, Old Saxon, Old High German, Middle English, Old Icelandic, Anglo-Saxon and Old English. As a result, at the age of 46 he became an Oxford professor and one of the best-known grammarians in the world.

### Ancestors Had Their Sugar

Cultivation of sugar cane is

among the extremely old agricultural

industries for it is reported that in India, before the Christian Era, soldiers

of Alexander the Great brought back the "honey-bearing" reed from the banks of the Indus.—Detroit News.

### A Broken Down System

is a condition (or disease) which

gives many pains, but which few really

understand. It is usually a disease of the

stomach, and is caused by the use of

alcohol, or by the use of drugs, or by

the use of stimulants, or by the use of

opium, or by the use of any of the

above-named substances. It is a

very dangerous disease, and is

usually fatal. It is a disease of the

## World's Poultry Congress

Exchange of Practical Ideas in Poultry Raising

Poultrymen from experts from the leading nations of the world will assemble at the World's Poultry Congress to be held at Ottawa, Canada, in the summer of 1927. It is already estimated that at least two thousand five hundred delegates will attend from the United States.

The World's Poultry Congress was organized for the exchange of the most practical ideas in poultry raising. It is also, like all world's congresses, affords a means of promoting understanding and good-will among the nations. The congress in Canada next summer will be the first held on this side of the Atlantic, or in any English-speaking country. The first congress was held at The Hague, Holland, in 1921, and the second at Barcelona, Spain, in 1924.

The showing made by Canadian exhibitors at the Barcelona congress was such that Canada was selected as the country of meeting of the third congress. This selection was strongly supported by delegates from both the United States and Great Britain. Ottawa, the capital of Canada, has been chosen as the city in which the congress will be held, and preparations are being made for a gathering on a scale exceeding either of the preceding congresses.

Visitors from the United States will travel by automobile as well as train, there being excellent highways to Ottawa through a country famous for its scenery. American tourists entering Canada without passports or any other restrictions.

### To Conquer North

Arctic Explorers of Seven Countries Plan Convention to Map Out New Expedition

For the first time in history Arctic explorers of seven countries are planning to meet in convention within the next few months. Their object will be the mapping out of a scientific conquest of the frozen regions of the north. The convention will be held in Cologne, Germany.

## WESTERN CANADA GOOD FIELD FOR OVERSEAS TRADE

Montreal—Canada, admittedly the most difficult field in the British empire for the exporters in Britain because of stiff competition, is becoming an increasingly important market for increasing attention among manufacturers across the water, and more firm principals personally are visiting the Dominion preparatory to marketing British goods here. E. Polard, new British trade commissioner for Western Canada, declared here.

Mr. Polard, who for the past five years has been in charge of Canadian affairs in the overseas department of the British Board of Trade, is en route to Vancouver, where he will establish headquarters. He follows L. B. Beale, who has been transferred to New Zealand.

"Western Canada, perhaps, offers a better field for the exporters in Britain."

"Out west we have a finer chance. The Panama Canal route has given us a cheap haul to the Pacific coast, and the British preferential tariff aids us. Results are most encouraging."

### Censorship Of

#### Reading Matter

Women's Press Club to Offer Co-operation With Daily Newspaper Association

Toronto.—Much of the crime among youth of Canada might be eliminated if salacious literature could be banned from circulation. Judge Emily Murphy, Edmonton, said before the Pacific coast convention of the Canadian Women's Press Club. Judge Murphy was speaking in support of a resolution brought in by Mrs. Mary A. Resolute, South of Calgary, asking for censorship of all Canadian reading material. It was decided to appoint a committee to offer co-operation with the Canadian Daily Newspaper Association which is acting in this matter.

Officers elected for the coming year were: President, Miss May Clelland, London, Ont.; provincial vice-presidents include, Manitoba, Miss Carolyn Cornell; British Columbia, Mrs. Isabel Ecclestone, Mackay, Alberta; Miss Edna Keiff, recording secretary; Miss Elizabeth Long, Winnipeg.

### Thinks Immigration Should Be Restricted

President of Canadian Trades Council Speaks At World Congress

London.—Tom Moore, president of the Trades and Labor Congress of Canada, was one of the principal speakers at a session of the world labor migration congress.

He declared Europe had come to Canada in the past, had worked long hours and had then returned to their homes to spend their earnings. For this reason, the Canadian trades unions were opposed to this kind of exploitation.

Mr. Moore urged restriction of the present unregulated influx of immigrants.

Dr. E. J. O'Connell, a prominent labor man, declared a great deal of unemployment in Australia was due largely to unrestricted immigration.

Australian labor, he said, was especially Italians, who worked for little wages, and retained ideals antipathetic to the best interests of labor.

### Resumed Air Mail Service

Man Aged Sixty-eight Substitutes For Regular Pilot

Chicago, Ill.—A 68-year-old airplane pilot hopped off from Maywood Field resuming the Chicago and Twin Cities Air Mail Line, which had been disrupted for a day by failure of the regular pilots to report for duty.

The pilot was Charles Dickinson, contractor, who declared that the temper of a few youthful pilots could not hold up the air mail to Minneapolis.

Ship Recovers Anchor

Purt Arthur, Ont.—The steamer, Glenoglen, on its last trip to Port Arthur, lost its anchor while in the mouth of a different channel, to recover it. Recently the Glenoglen came into port and dropping its new anchor, found it hooked onto the old one, which was thereby recovered.

W. N. U. 1435

## Will Fight Miners' Leaders

Lord Birkenhead Charges A. J. Cook With Attempt to Blackmail Society

London.—Following closely upon a decision of the Labor party to offer strenuous opposition to the government's new bill which have as their purpose a re-organization of the mining industry, the Earl of Birkenhead, secretary for India, has delivered a verbal broadside against A. J. Cook, secretary of the miners' federation.

Cook was charged by Lord Birkenhead of aiming at the destruction of the coal mining industry and nationalization of the mines.

Lord Birkenhead said he and his colleagues were fully determined that if they were driven to it by "this attempt to blackmail society by men who declare they have a strange hold on the vital chords of industry, we shall once again, sorrowfully but firmly, fight ourselves for a great struggle. We shall not permit the nation to be destroyed."

"We, who have broken down every despot in Europe," Lord Birkenhead said, "will not be broken down by men who take their hideings from a discredited revolutionary junta in the most poverty-stricken country in Europe."

## Union Of Municipalities

Swift Count—Over 100 delegates were in attendance at the Union of Municipalities Association convention. Twenty-one years ago the association was created and during the sessions many congratulations were showered on the officers and the members for the work it has done during its life.

Chief Justice Brown of the Court of King's Bench, the chief speaker at the opening meeting, sounded the keynote of the work of the association when he spoke of the responsibilities of the thousands of men in the province charged with municipal effort and enterprise. He congratulated the municipalities of the province on having a clearing house for opinions and discussions and ventured the opinion that this particular organization and others engaged in municipal work were part of the foundations upon which the building has been sanely and wisely built.

## Elevators Practically Cleared

Saskatchewan In Good Shape to Handle New Crop

Regina.—Saskatchewan's elevators are now ready to receive in their thousands of bins the fruit of the forthcoming 1925 crop.

Reports coming at both the Canadian Pacific and Canadian National Railways state that all grain are now practically cleared out and the elevators ready to store up the new crop.

Less than 375,000 bushels of all grains now remain in elevators of the Regina division of both railways, many of the points holding less than 250 bushels. Less than 100 cars of grain are being moved each day from the province going east.

Practically no loading is being done at any points despite the fact that the wheat pool still comes into force on July 15, the date on which all 1925 wheat must be in the country elevators and settled for or billed out.

## Canada and the League

League of Nations Has Now Cost Canada \$1,900,000

Ottawa.—After stressing the importance and achievements of the League of Nations, Sir George Foster in the senate declared it was the duty of the government to put in the hands of members of parliament each year details of the government's relations with the league. He had informed the senate each year of the league's work, but, said Sir George, the correspondence between the government and Dr. Riddell, liaison officer at Geneva, should be available to parliament.

Senator Cargill replying said that Canada had spent \$1,900,000 on the League of Nations, and while the league was seven years old, there were more men under arms here today than before the Great War. It has not been conducive to peace, he said.

Missing Evangelist Found

Douglas, Ariz.—Positive identification of a woman here as Mrs. Grace Simple McPherson, Los Angeles evangelist who was reported drowned there May 18 last, has been made over the telephone by Mrs. Minnie Kennedy, the evangelist's mother, in conversation with William P. McCarry, editor of The Dispatch.

Rural Credit's Bill

Ottawa.—The government's rural credit bill passed the senate committee on banking and commerce and now stands for third reading in the upper house.

## Compromise On New Flag

South African Government Likely to Accept Suggestion of Liberal Party

Capetown, South Africa.—The controversy over the government's proposed new South African flag, the design of which would have excluded the Union Jack, has assumed a new aspect.

The national council of the Labor party a few days ago passed a resolution that there should be equal official recognition of two flags, one a symbol of the empire and the other a symbol of South Africa nationally.

A deputation from the council has now interviewed Hon. Tielman Roos, minister of justice, and the executive of the Nationalist party at Pretoria. The latter have expressed complete satisfaction with the Labor party's resolution, and moreover have pledged the full support of the Nationalist party to this resolution. It is by means of a pact between the Nationalist and Labor parties that the government of Premier Hertzog in power, the government may accept this compromise.

## Locarno Peace Pact

London Is Interested in the Canadian Viewpoint

London.—The debate on the Locarno peace pact in the Canadian House of Commons, in connection with Premier Mackenzie King's motion that parliament must pass on treaties before they are ratified by the cabinet, aroused much interest here.

The Express declares that a useful purpose would be served if all the parliaments of the empire, including the British House of Commons, followed Canada's example in face of the obligations involved.

## RAILWAY RATE CASE IS ARGUED BEFORE BOARD

Regina, Sask.—Suggestions for the removal of the alleged discrimination in freight rates favoring Winnipeg over other prairie distributing points was made to the Board of Railway Commissioners by J. McEwen, appearing for the province of Saskatchewan on behalf of the boards of trade of Regina, Yorkton and Moose Jaw. The discrimination was said by counsel to exist in the fact that Winnipeg had the full advantage of a fictitious mileage that was assumed between Port William and Winnipeg, while points beyond the latter city had the advantage only as far as Winnipeg. These rates were calculated on an actual mileage.

The difference, said Mr. McEwen, in filing comparative statements, meant that on goods shipped from Port William over the C.P.R., Winnipeg had a rate reduction of 25 per cent, while westward this reduction decreased until by the time it got to Qu'Appelle the percentage was down to 12, at Saskatoon it was 10 per cent, and at Calgary 4 1/2 per cent.

What the province wanted, said Mr. McEwen, was removal of the unjust discrimination. How this was to be accomplished was up to the board, but among the various solutions that might be offered that of removing the fictitious mileage altogether and setting up a new freight rate structure, which would divide the advantage equally among all the prairie points seemed to be the most equitable.

B.C. Lumbermen's Wage

Vancouver.—Effective November 1, all men engaged in the lumber industry of British Columbia will receive a minimum wage of 40 cents an hour, according to an announcement made by the board charged with administration of the new male minimum wage act.

Approximately 60,000 persons are employed in these operations.

British Rotarians for Denver Convention

Above is a party of British Rotarians on their way to the International Rotary Convention to be held at Denver, June 13 to 20. Front row seated are: C. White, President of the Rotarians, Belfast; J. E. Appleyard, Leeds; H. Winlock, Plymouth; J. E. Webb, York; L. E. King, Bournemouth. Ladies are: Mrs. C. White, Mrs. Appleyard, Mrs. Webb, Mrs. Smith, Miss Coghill, Mrs. Kingston. Back row: J. Smith, Liverpool; W. Curdy, Dublin; C. Kingston, Dublin; J. Riddell, Doncaster; Edward Wilkins, Bradford; G. Charlesworth, Doncaster; W. Webster, Plymouth. Seated at back of group is George Woodward, chief officer of the Canadian Pacific liner, Montclair.

On their return from the convention this party will travel through Canada via Canadian Pacific lines, stopping at Winnipeg, Toronto and other cities.

## LOYD GEORGE IS NOT LOOKING FOR LEADERSHIP

London.—Speaking on the "future of Liberalism" at a luncheon of the National Liberal Club, former Premier Lloyd George, Liberal parliamentarian, kept his audience in roars of laughter by humorous sallies and allusions at his political opponents.

He declared his ambition was not for leadership, but for service, and added: "At the same time, I do not want to ruffle anybody's feathers, but I want to say quite firmly that I am not going to allow myself to be driven out of the Liberal party."

Alluding to Winston Churchill's receding hair, Lloyd George's attitude in the general strike marked the beginning of Lloyd George's downward course, the former premier remarked that so far as he could see, the downward course began when he stopped Mr. Churchill's "mad adventures in Russia," and said ironically, "Since then I have touched the depths by mixing with archbishops and such like in suggesting that conciliation was a good thing to settle the general strike."

Winston Churchill retaliated later in the evening by rebutting Mr. Lloyd George's allegations of "mad adventures" relative to the allies' support of Kolchak and Denikin—by stating that these promises of support were given by the Supreme War Council of 1919, of which Mr. Lloyd George himself, Woodrow Wilson and M. Clemenceau were the leading members, and he would not rob Mr. Lloyd George of any credit on this score.

## Prince Celebrates Birthday

Hair Apparent Receives Messages of Congratulation From All Parts

London.—June 23 was the Prince of Wales' thirty-second birthday and flags were flying throughout the country in his honor. The hunting displays were particularly brilliant in the west end of London. For days the last apparent was inundated with messages of congratulation from all parts of the world. He had luncheon with the other members of the royal family at Buckingham Palace and a private dinner party for close friends at his own home, York House, St. James' Palace.

## Discuss Red Lake Railway

Bill Granting Charter to Private Company Fails to Pass Committee Stage

Ottawa.—For a third time the bill to incorporate the Red Lake and North Western Railway has been "talked out" in the house.

Twice a week the first hour after dinner session is devoted to private bills by routine. At nine o'clock, the house resumes the order of the day automatically. The Red Lake Bill, which would give a charter to a private company to build a road into that mining district, had failed to pass committee stage twice.

B.C. Lumbermen's Wage

Vancouver.—Effective November 1, all men engaged in the lumber industry of British Columbia will receive a minimum wage of 40 cents an hour, according to an announcement made by the board charged with administration of the new male minimum wage act.

Approximately 60,000 persons are employed in these operations.

## Western Financing Methods

Municipalities of Western Canada Are Showing the Way to Those of East

Vancouver.—"Municipalities of Western Canada are showing the way to those of Eastern Canada in the handling of their finances," declared C. P. Foll, one of Canada's leading authorities on public financing, on his arrival in Vancouver as a member of the Investment Bankers' Association party, which recently held its annual meeting at Jasper Park.

"In British Columbia in particular," he said, "the municipalities have been reducing their debt in actual numbers, and the same is true in Saskatchewan. In Eastern Canada, especially Ontario, the reverse tendency is true."

"The provincial governments of the western provinces have also been showing a strong tendency in the handling of their finances."

About 100 members of the association are spending several days in Vancouver before the eastern members return home. A few of their number, including President E. H. Daly, went north to Alaska from Prince Rupert.

## To Settle Vacant Lands

Hudson's Bay Company Will Formulate Immigration Policy

Victoria, B.C.—The Hudson's Bay Company, which owns vast tracts of land throughout Western Canada, is gathering material on which to formulate an immigration and settlement policy. It became known here, with the arrival of J. McWhirter, of the company's London, England, office, to confer with E. H. Wilson, land commissioner of the company.

McWhirter explained that the vast possibilities of bringing out settlers from the crowded parts of the British Isles and settling them on the idle lands of Canada were under consideration. He said his present trip was for the purpose of gathering information.

## Soldiers' Lands Bill

To Provide For Revaluation of Soldier Settlers' Land

Ottawa.—The senate gave third reading to the government's bill to provide for revaluation of soldier settlers' land.

As the bill now stands soldier settlers will apply to the settlement board for revaluation and if no agreement can be reached the settler may carry an appeal to the exchequer court. The governor-in-council is empowered to make regulations or to modify or dispense with the rules and practice of the exchequer court in order that that body may deal with revaluation cases. The decision of the court will be final.

## May Be Raised Again

Scarcity of British Ships Affect Rate of Coal Shipments

London.—Rates on grain shipments to the United Kingdom from North and South American Atlantic ports, already increased through the scarcity of British ships in operation owing to the coal mining stoppage, are expected to be boosted again in a few days as indications the miners will soon return to work. Rates on shipments from Canada have increased a little less than three cents.

## NEARING END OF THE COAL STRIKE IN GREAT BRITAIN

London.—Indications of early negotiations for coal peace were seen in the announcement by Prime Minister Baldwin of postponement for a week of action on the bill authorizing eight hours of work in the mines. While the bill for the re-organization of the mines is being pushed. It is said to be the result of a bargain between the Laborites and Premier Baldwin.

If labor is satisfied with the re-organization plans, it may not be necessary to proceed with the eight-hour bill, as miners may agree to accept a small reduction in wages for a period rather than an increase in hours.

Herbert Smith, president of the miners' federation, in speeches recently declared a wage reduction to be better than an increase of hours.

George Cook, of the miners' federation, is still asserting "two a penny off; not a minute added," but there are strong indications that the miners are getting tired of Cook, and it is freely predicted in labor circles that as soon as the strike is over he will lose his job.

The principal feature of the miners' re-organization bill is amalgamation of the mines.

## SAYS WEST IS NOT COMPETING WITH THE EAST

Toronto.—If the bankers of the east and the farmers of the west would get together, the greatest of the problems facing agricultural Canada would immediately vanish, in the opinion of Hon. J. O. Gardiner, Saskatchewan's youthful premier. Mr. Gardiner told the Liberal Association here that the west was not competing in the marketing of wheat with the east, but with the Northern United States, the Argentine and Siberia and for that reason the co-operation of the eastern provinces was much to be desired.

Dealing with transportation to the seaboard of western grain, he expressed the hope that some day there would be a direct shipping route from the head of the Great Lakes to Montreal. He looked for a largely increased production in the near future and said that for that reason Western Canada would need every trade route across the Atlantic Ocean.

## Welcomes Famous Flier

New York Gives Tremendous Greeting to Commander Byrd

New York.—Lt.-Commander Richard E. Byrd, Jr., leader of the first expedition to fly over the North Pole, upon his return here received a tumultuous greeting in which representatives of the nation, state and cities joined. Thousands jammed the waterfront at the Battery and lined the sidewalks of Lower Broadway to catch a glimpse of the polar bird.

Led by two bands, one representing the navy and the other the New York National Guard, the procession started up Broadway.

Present among the welcome were members of the Hudson's Bay company. Byrd's own family: His mother, his six-year-old son, Richard, and his wife.

Crowds roared their ovation as the procession moved along the famous thoroughfare at high noon.

## Advocates Third Route

Hudson's Bay Railway Will Solve Western Problem Says Premier

Gardiner

Exeter, Ont.—Premier James G. Gardiner, of Saskatchewan, addressing a meeting here said the farmers of Western Canada are different from those of Eastern Canada. Yet to be a great country, east and west must work in harmony, he declared.

The trade route problem of the western provinces is the cause of many inconveniences to the farmers there. The new Pacific route is solving that problem, yet a third route should be opened by way of Quebec in order to give means of shipping the increasing crops of the prairies. He believed the Hudson's Bay route would give easy means of shipping to European markets.

## Discard Washington

Naval Agreement

U. S. Delegates Amazed At Action Of Experts At Geneva

Geneva.—The essential feature of the Washington naval agreement, namely, comparison of naval strength by the tonnage of different types of warships, was discarded by the naval experts on disarmament to the evident amazement of the United States delegates.

The discussion created a sensation because it affords a threat on continental Europe's view on extension of the principles of the Washington accord.

To Gauge Public Opinion

Bayfield, Ont.—The government is going to canvass public sentiment from one end of the province to the other regarding the Ontario Temperance Act, and when convinced on the proper course to pursue will submit that course to the people. Premier G. H. Ferguson said in addressing upwards of 5,000 people assembled here under auspices of the Western Ontario Conservative Association.

Is Appointed Chairman

Ottawa.—The minister of labor has appointed Mr. Justice Lamont, of the Saskatchewan Court of Appeals, as chairman of the Board of Conciliation in Western Canada strikes dispute. The members of the board are F. Dixon, of Winnipeg, representing the employers, and J. B. Coyne, of Winnipeg, representing the company.

Following a recent decision, the Base Canal is to be deepened from 21 to 35 feet, and widened from 150 to 300 feet.

## SCOUT NEWS

Come On Out!

The Crow's Nest Pass Cubs went on a hike to the Crow's Nest Lake on Saturday afternoon last.

The annual camp will be held next week at Lee Lake. The Cubmaster will be grateful for the loan of two cars on Sunday evening, July 4th and Saturday July 10th, to convey the boys to and from Lee Lake.

There will be no meetings of the Cubs during July.

Scout Sydney Leith of the Pro-Cathedral Calgary Troop of Boy Scouts, will be a visitor at St. Alban's Rectory during July. He will take charge of the recreation of the Cubs in camp.

## Personal and Local

Large congregations attended both morning and evening services at St. Paul's Church on Sunday last, when the Rev. D. K. Allan preached his farewell sermons.

Mrs. Chas. Graham, who has been visiting relatives in Edmonton and Midlandvale, Alta., returned home Tuesday morning.

Mr. O. M. Giesnes of the T. K. Kelly Sales System, who conducted so successfully the big Close Out Sale for the Quimette store, left Monday night for Medicine Hat, where he takes charge of another large sale in that city.

The front exterior of the Palace theatre has been greatly improved by the application of a coat of stucco.

Little Peggy Emmerson met with a very painful accident last Saturday, when in taking a chisel away from her younger sister, the sharp edge of the instrument inflicted a very painful and serious injury to one of her eyes. She was taken to the hospital and received medical attention and it is thought that the injured optic will yield to treatment.

The combined I. O. O. F. and Rebekah lodges are holding a basket picnic on Sunday, July 11th, at a place to be decided upon later. All members and visitors of these lodges are invited to meet at the I. O. O. F. hall at 1 p. m.

A successful sale of work and home cooking was held in the Salvation Army hall on Saturday last, and the sum of \$67.55 was raised. The comrades of the Home League and the Captain wish to thank all who helped to make it such a success.

If your wife laughs at your joke, you may rest assured that it's either a darn good joke or you have a darn good wife.

Capt. M. C. Milley, of the local Salvation Army, left Tuesday morning for Winnipeg, where he will be stationed in future.

## Here and There

S. Janowski and B. Stanhauser, the former Polish immigration delegate and the latter a delegate from the Polish Minister of Agriculture, are in Canada for a six-week study of farming conditions in western sections of the Dominion. They will look into the distribution of work among the Polish colonies in Canada.

Four fishermen from the United States went fishing on the Cains River, New Brunswick, for 13 days recently, and caught 340 fish. State Senator Bradford, of Indiana, caught a 43-inch salmon weighing 27 pounds. Others in the party were: Fred N. Peet, Dr. E. R. Zimmerman and D. H. Faxon. Only barbed hooks were used so that no fish were either killed or injured.

The second largest outdoor swimming pool in Canada has been opened at Lake Louise on the Terrace between the dining room of the Chateau and the Lake. The new pool is 100 feet long and 40 feet wide. It is surrounded by tall concrete columns between which there are gigantic sheets of plate glass, providing a wind break against cool breezes.

Approximately 120,000 live fish, fresh from American hatcheries, passed through Dominion Express Yards, Windsor Station, Montreal, recently, on their way to Beauchaine, Quebec. They will be used to stock private lakes in northern Quebec owned by wealthy citizens of the U.S.A., who prefer the virgin hills and forests of Canada to the densely populated summer resorts of their own country.

Norman E. Wilkinson, London, England, inventor of camouflage paintings which was used extensively during the late war, arrived in Canada on the Canadian Pacific liner "Montcalm" with his wife recently, for a tour of the Dominion. Sir Clifford Sifton, prominent Tontonian, and Sir Stanford Prunton, M.I.M.E., famous mineral geologist, also arrived on the same vessel.

Col. C. H. D. Ryder, C.B., C.I.E., D.S.O., chairman of the Air Survey Company of London, England, interviewed Premier Mackenzie King and the prime ministers of the various provinces with regard to finding out the prospects of surveying practically the whole of the Dominion by air. He also wishes to know about the possibility of combined federal and provincial action for these surveys.

## Swimming Pool at Chateau Lake Louise Opened

1. Going it alone. 2. Rotarians at opening of the new pool. Two ladies of the party about to test the inviting depths. 3. Caught between the mountains and the water below, this swimmer seems to be flying up to the sky.

The second largest swimming pool in Canada has just been opened at Lake Louise. Situated on the Terrace between the Dining Room of the Chateau and the Lake, the new pool is one hundred feet long and forty feet wide. It receives its water from the Virgin depth of Lake Agnes, which is located up in the summer snow zone between two mountain peaks, twelve hundred feet above the Chateau. This water is sloped heated to 74 degrees.

The new pool is surrounded by tall concrete columns between which there are gigantic sheets of plate glass giving its walls full openness and providing a wind-break against

cool breezes. The top is entirely open to the penetrating rays of the Rocky Mountain sun. Each of the twenty columns around the pool is surrounded with pot growths of beautiful Rocky Mountain flora which, coupled with the delicate green hills of the plate glass windows and the mountain greenery of the pillars, lends an intriguing attractiveness to the open greenness of the big terraced campus of the Chateau. Interspersed here and there with vivid yellow and orange beds of Iceland poppies. A beautiful and unique feature of the pool is the swimming suits, all of which are of a flaming orange color to harmonize

with the sloping beds of poppies which run down from the dining room and surround the pool on all sides.

At the deep end of the pool are three diving boards, two of which are three and a half feet high and the centre board ten feet, providing the standard Olympic heights.

Glad Anderson, famous swimmer and skater, and former life guard instructor at Chicago, has been engaged as the permanent swimming instructor, with an assistant.

A large number of Rotarians attended the first day of the opening of the Chateau Lake Louise pool.

# Canada Must Not Relax In Offering Inducements To Settlers From British Isles

The report of the British overseas settlement committee for 1935 shows how little Canada can afford to relax its activity if it wishes to fill its vacant spaces with Old Country stock. Whether it is recognized or not, there is considerable rivalry for the best of the British Isles. This country has to contend with the charms and the shillings of Australia, and, so far, does not appear to be getting the better of the bargain, says the Toronto Globe.

Last year out of 43,677 persons who left Britain under the overseas settlement scheme, 11,442 came to Canada, 8,951 to New Zealand and 4,601, while 115 went to South Africa. So, there is a disposition to believe that Canada can still back in comparison and await the arrival of a new population, even with the advantages and assistance offered, it should not be continued.

Australia is not overlooking any opportunity to get settlers from the British Isles. It is extending just as far-reaching inducements as this country, and is alert in following them up. Notwithstanding the new rates put into effect to this country—£3 to eastern ports and £9 to British Columbia—our friendly rivals on the other side of the world are ready to meet us. They have recently undertaken to raise loans to the amount of £34,000,000, to be apportioned among the various states of the Commonwealth, to assist in settlement. This is expected to provide for the admission of 450,000 immigrants, including 34,000 families, within the next five years. And Australia has considerable to offer new arrivals when they reach her shores.

This bidding for immigrants is of decided advantage to those seeking new lands to conquer. Unassisted migration is falling off. It is evident that the country which shows the greatest energy and offers the greatest aid is going to get the people; and there is some chance in the Old Land over the restrictions imposed—so much, in fact, that it will be a subject of consideration at the next Imperial Conference.

With this existing competition the whole question of immigration promises to take on added importance. Canada will have to alter its tactics, but at the same time cannot afford to let down the bars to all who wish to come, or to go beyond the limits of reason in extending inducements to the country new-comers, but the kind who will help themselves when given an opportunity.

## The Red-Backed Cutworm

Summerfallow Method of Control Is Recommended

The red-backed cutworm, which feeds upon a wide range of food plants, is the most widely distributed and generally destructive cutworm in Canada. It is a constant hazard to crops in the prairie provinces, and is the most important kind of cutworm in Manitoba and Saskatchewan. In view of these facts the Dominion department of agriculture has issued a new bulletin on the red-backed cutworm and its control in the prairie provinces. It is pointed out in the bulletin that fully half of the damage caused by cutworms to field crops and nearly 90 per cent. of that to garden crops can easily be prevented if the proper means of control are adopted. No spring-sown crops immune to cutworm injury are known, but fall rice is recommended as a resistant crop. In the bulletin, which may be obtained from the Publications Branch of the Department at Ottawa, the value of poisoned bait, even in fields, is emphasized, and a summer-fallow method of control is also recommended. This consists in cultivating frequently during spring and summer to bring weeds under control. Though deeply in misapprehension a section of harrow behind the plough, but otherwise leaving the surface as rough as is permissible, with due regard to moisture and conservation. Allow the land to crust and remain unworked until after the first week in September; then cultivate to destroy the weeds. The eventual point is to have the fallow crusted the period of flight of the moth, from about July 30 to September 5, in order to make the lands unsuitable for egg-laying.

## Hint For Beekeepers

Decolour bees with a new type of bee-colouring device, according to the inventor of the device. By lancing the time needed to manufacture comb, it is said to enable the bees to double the output of honey. Aluminum combs are painted with bee-colour.

This seldom adds to the value of pictures painted by Hope.

W. N. U. 1435

## Protein Test For Wheat

Plea Made For Grading of Wheat According to Protein Content During a discussion of estimates in the House of Commons, John Miller, Progressive, G. Appelle, made a plea for the grading of wheat according to protein content rather than by the present standards by which it is measured.

He thought the National Council of Scientific Research might do a great service if it investigated this possibility.

He believed that at present the Canada Grain Act did not define fully the virtues by which a really hard wheat should be measured.

Mr. Miller, at some length, gave instances in which the grade of grain had been lowered through a slight bleaching, and the lower prices obtained, while the protein content remained the same. He did not suggest that the protein test be the only factor in the grading of wheat, but it should be one factor.

The protein test, in a very large measure, indicated the value of the higher grades. Stanley Tohn (Liberal, West-Can.), supported the suggestions made by Mr. Miller.

Hon. J. A. Robb, minister of finance, said it would not doubt be a desirable thing to bring about.

He was not at all sure that wheat producers in Canada might get a better price for premium extra protein wheat. However, he was informed that the National Council of Research had arranged that a sub-committee of that body should consult with the board of grain commissioners on the question of a wider system of protein test in wheat.

## Survey of Mineral Possibilities

Saskatchewan Government to Carry on Extensive Investigations This Summer

The Saskatchewan Government will make a complete survey of the mineral possibilities in that province this summer. Investigation of coal deposits and other mineral resources in Lac La Ronge will be made this month by a party in charge of C. B. Hastings, mining engineer and geologist. He will follow up the preliminary survey made by the provincial geologist, who found indications of the existence of high-grade coal in the neighbourhood of Lac La Ronge. On his recent return from that survey, Professor Worcester reported findings of coal over an area of about 100 miles long. Oil shales and lignite were also reported in the Lac La Ronge area. At the same time another party will go north to Cold Lake, travelling across the Meadow Lake and back to Big River, in company with Professor Worcester.

Two tons of imitation pearls were used in Culver City, Cal., to fashion costumes for movie actresses in a huge "pearl ballet" dance.

## The Cattle Industry

Western Progressive Advocate Putting Cattle On the Free List

The real way to assist the cattle industry of Western Canada is to let the United States to remove the duty or reduce it, G. G. Coote, Progressive member, Macleod, Alberta, told the House of Commons committee on agriculture. Mr. Coote said that the logical market for certain classes of Canadian cattle was in the United States, and that the closing of the market had been a serious blow to the industry in Western Canada. He favored putting cattle on the free list, but if that was regarded as impossible at present, he advocated making the Canadian tariff exactly the same as that of the United States with the definite provision that when that country made a reduction, Canada would follow suit. Canada was not afraid of competition from the American cattle, he said.

Colonel H. A. Mullin, Conservative, Marquette, opposed any "move" which would admit United States cattle to Canada. He feared that they would bring disease and infect the Canadian herds. The best market for Canadian cattle was in Great Britain, he said.

Hon. S. F. Toime, Conservative, Victoria, expressed the opinion that the United States would keep the tariff on cattle as long as it considered it in their interests to do so.

Mr. Coote stressed the importance of appointing a Canadian trade commission at Washington, who would be in a position to look after the interests of Canada when legislation affecting this country came before congress.

## Eggs Used In Tanneries

Special Mixture Valuable in First Process of Leather Making

Eggs that are worthless so far as food value goes, are not wasted by the large dealers, but are covered with kerosene after being broken, treated with boric acid and sold to tanneries for use in one of the first processes of making leather. The shells are removed by sieves and the egg mixture is placed in a revolving drum with the raw hides to make them pliant—New York World.

## Strange Things Happen

Hon. Mr. Robb declared to the Ottawa delegation: "The government will stick to its guns." Now comes the announcement that, because of the announcement that, because of the changes made in the tariff since the Ottawa protest to Ottawa, the General Motors plant is to be enlarged. Coupling these two statements together, we'd say that Mr. Robb knew the kind of powder to use in those guns—Exchange.

If there is honor among thieves there should be some among politicians.

# Results Of Another World War Would Be To Shatter Foundations Of Civilization

## Poultry Industry Aid To Population

Also Helps to Build Up More Prosperous Race

"The poultry industry will help to stem the tide of population from the country to the city and other across the border," declared Edward Brown, P.L.S. of London, England, speaking before the Provincial Poultry Association at the Veterinary College in Montreal.

Prof. Brown, who is president of the International Association of Instructors in Poultry Husbandry, is making a tour of Canada in the interests of the World Poultry Convention, to be held at Ottawa in the summer of 1937.

"The poultry industry will help us to build up a better and more prosperous race," he asserted, and showed it would provide a great deal of profitable employment, especially in Canada where opportunities are endless.

Several thousand delegates representing nearly all civilized countries are expected to attend the congress, which is the third of its kind. The first took place in The Hague in 1925, the second at Valencia, Spain, in 1929. R. J. C. Stead, director of publicity in the immigration and colonization department, stated that the benefits of the congress by no means were confined to poultry interests. The great number of visitors, particularly from Europe, would see in Canada a land where democracy and peace reign, and a single defensive measure was necessary to keep harmony. It would also show them two great races with different languages—French and English—living together in like harmony.

## Sheep Farming Favored

Desirable Form of Agriculture For South-East Section of Alberta

Abandoned farms in the southeast of Alberta are being picked up cheaply by farmers, and it is reported that a favorable eye is being turned on sheep as the most desirable form of agriculture for the district. There is plenty of range for the small hands now in that country, and the chief concern of the flock owners is to raise enough winter feed for them. Corn appears to be the best crop for that direction. Many are planting sweet clover with their grain crops also, planning on pasturing this, or using it for hay next year.

Transferring wheat directly into dough without a milling process has been accomplished in France.

Poverty keeps off more cases of gout than all the physicians cure.

## New Clan Donald Settler Shows Initiative

One of the many interesting features of the recent general strike in Glasgow was the achievement of the Shorter family, natives of Birmingham, who arrived recently in Canada on the Canadian Pacific liner Metagama. Mr. Shorter had made arrangements to sail from Glasgow, but owing to the strike he was unable to get a train and there were only ten short hours in which to get the boat. The head of the family, having said his effects in the Old Country, possessed a certain amount of cash. He bought a motorcycle with a side car, bundled his wife and two kiddies, bagged and dollies and all, into the rancorous sail from Glasgow, but owing to the strike he was unable to get a train and there were only ten short hours in which to get the boat. The head of the family, having said his effects in the Old Country, possessed a certain amount of cash. He bought a motorcycle with a side car, bundled his wife and two kiddies, bagged and dollies and all, into the rancorous sail from Glasgow, but owing to the strike he was unable to get a train and there were only ten short hours in which to get the boat.

## Round up Of Wild Horses

New Staging West May Be Last Event Of This Kind in the West

What may be the last wild horse roundup is now in progress in the stretch of territory between Medicine Hat and Standard, and between the Bow and Red Deer Rivers. The animals that are caught are checked over. Those that are useful are kept, those that are not are destroyed. The bands of wild horses have increased in the last few years until they have become a nuisance to the ranchers.

## For Tuberculosis Research Work

Hon. J. A. Robb, minister of finance, announced when a vote of \$15,000 for tuberculosis research work was being considered, that the council was undertaking work in the field of tuberculosis together with the federal department of health. For this purpose the amount of the vote was increased to \$15,000.

Safety matches made in Sweden and shipped to America last year weighed 31,000 tons.

**CHAPTER VIII.**  
**Joanna Makes a Decision**  
 After a time the girl, huddled on the floor in a heap of bobbed brown hair and clinging gown and the stoned legend, uttered the birth of a new cob and stopped the convulsive tremble of her bare, velvet soft shoulders. Her eyes, as quick to dry as to dim with moisture, which is the way of youth, selected a spot on the pattern carpet, just beyond her toes, and fixed on it. She sat very quiet, and stared, straightening out the jumble of her blower, very bitter thoughts. She realized that she couldn't think without for the things that had happened during the hectic day had been sensible things—any of them.

It was a trait of her's to rebel when things weren't right; she couldn't analyze, or probe for reasons, or ask her self if she were to blame. That is, she could ask if she were to blame when things got into a jumble, but her invincible answer was "No." Time was when the spirit of Joanna was submissive and amenable to discipline, and to the learning of lessons out of experience. That was a long time ago—before she had made her own way about and competed with other girls—with the ones who were on the square, as well as those who weren't. She gradually lost her sense of submissiveness then. Whoever criticized her, except herself, was wrong. Her tongue grew smarter, more and more accustomed to giving than it received; and her lips grew redder and more provocative, and her skirts became shorter, everybody!

Even John! The one thing she admitted to herself. "You're a time-taken, even a girl—a real, square and above-board girl who had to fight like the devil to keep up with the other girls of this day and age! John had objected to almost everything she did or wore or said. He'd preach by the hour. Once, in this same parlor—

## OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario.—"After a severe operation and a three weeks' stay in a hospital I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pain and suffering until I thought there could be no help for me. I had very severe pains in my left side and suffered every agony month. One day when I was not able to get up my mother begged me to try Lydia E. Pinkham's. My husband got me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you can't be too long in all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five of the Compound Tablets and two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the Sarsaparilla. Write to me at Box 100, Coniston, Ontario."

W. N. U. 1635

### Maax Oath Is Extraordinary

**Pledge Required Of Deamster of Isle of Man**  
 The following is an extraordinary oath taken by the deamster of the Isle of Man, on entering office.  
 "By this Book, and by the Holy Contents thereof, and by the Wonderful works that God hath miraculously wrought in the Heaven above and in the Earth beneath, in six days and seven nights, I the person being sworn do swear that I will without respect, favor or friendship, love or gain, conanguinity or affinity, envy or malice, execute the laws of this Isle justly between the Sovereign Lord the King and his subjects within this Isle, and between party and party, as Indifferently as the herring's backbone doth lie in the midst of the fish! So help me God and the Contents of this Book. This oath has been taken by many deamsters for a thousand years."

She'd given up, long ago, her struggles against the language of her young lady roomers. "Are you really sure, Jo," she asked, her words coming slowly, "that you haven't had, what you call a smash? All this money you had in your pocketbook, and you say there's more besides. You know—"

Before the steady gaze of the girl on the floor, the landlady refused the eyes that stared at her made her uncomfortable—uneasy with her doubts. "You see, Jo," she argued, plaintive in her self-justification, "the things-a-girl like you must have, and knows about, and the places you go! George wears her clothes too tight and she says that's what girls are supposed to do nowadays. And you wear dresses that you ought to never cross your knees in—your ought to sit down at all; it's worried me a lot. And you smoke, Jo, and I've heard you swear, too. That's why John was ready to believe—"

"You mean that's why you believe, too?"  
 "I won't believe, if you tell me it isn't so. I'll just believe in you and I'll take back the money you gave me." Suddenly, the landlady was confuted. "My sorry, Jo, but I put the five hundred dollars, and nobody knows what a God-send it would be to me, in the pockets of your old wrap. The coat's on your bed, now. If you say it came to you right, like you say before, I'll take it, dear, and bless you for it!"

Joanna scrambled onto her feet, straightened her frock, brought a strap that had fallen back, cast her shoulder and, without a word, ran up the stairs to her room. When she reappeared she held the bill. She put it into Mrs. Adams' hand and folded the words fingers about it. Neither she nor the landlady spoke. Mrs. Adams pulled the bobbed head down and kissed it.  
 "For once," Joanna remarked, when she straightened up, "I want a drink. I'm going to wait until George comes in, if she makes it early enough, and if her boy gets the air too quick I'll buy them a taxi while we hunt an all-night bootlegger."

George arrived, early—on a clock. Her companion of the evening was sufficiently equipped to supply Joanna's unaccustomed need, and glad of the excuse for lingering over his dismissal. Joanna's bitterness was melted, but far from banished, when a streak of gray, stealing across the court of arched backyards, warned the two pyjama-clad girls propped up in their chairs that if they were to have any sleep at all against the excitement of the day to come they must get between the covers and trust to the housemaid to awaken them. Many houses had been built, some of those that were destined to stand forever, some cards that would be blown away.  
 (To be continued)

### World Wants Trained Minds

**Most Important Positions Go To Those With University Training**  
 The world makes money with the sweet girl graduate, the blandly superior bachelor of arts, panoplied in rabbit skin, armed with a sheep skin, going out jauntily to conquer the world. But with the business man, the farmer, the workman may laugh at some of the fantastic tricks cut before him by a few of the products of our institutions of learning who find it difficult to adjust themselves to a working world. The university graduate of today is respected and appreciated. The world recognizes the value of a trained mind, and has entrusted most of its important positions to men who have had the advantages of a university training—Regina Leader.

She? "Oh, yes, everyone knows about it. Some take her part and some take his."  
 He? "And I suppose there are one of two eccentric people who are minding their own business!"

### She Could Never Do The Things Other Girls Did

Miss I. J. Ross, Sordland, Alta., writes:—"I am only twenty years old, but have suffered from heart palpitation and nerve trouble for several years. I could never do the things other girls did, that is, I was not a sports, skating, etc., and could never depend on myself at work. About six months ago I began taking

### Good for All the Family

It makes them smile—it's sure worth while.

After every meal

### Explored Land Of Head Hunters

**Scientist Secured Film Showing Process of Head Curing**  
 Dr. H. T. Dickey, well-known scientist, and his bride of a few months, the former Elizabeth Parker, have just finished an exploration trip that carried them through the land of the head hunters and the most remote parts of South America. Dr. and Mrs. Dickey, with a staff of six experts, have reached Paris, Brazil, completing a trip that began last November and carried them across the Andes Mountains on muleback. They obtained a full motion picture record of the process of reducing and curing human heads as practiced by the Jiveros of Eastern Ecuador. The Indians had just returned from one of their head hunting expeditions, which she went to be in retaliation for the kidnapping of their women by another tribe.

The party, which left Guayaquil, Ecuador, last November, crossed the Andes on muleback, encountering perpetual snow at an altitude of 15,000 feet within two degrees of the equator. They descended the eastern slope of the Andes into the dense jungle of Ecuador and then entered the country of the Jiveros. There they trekked 300 miles overland through the jungle to the head waters of the Napo River. Embarking in canoes the explorers paddled down the Napo to the Amazon River, whence they proceeded to Iquitos, Peru. A 2,000-mile paddle still awaited them in order to reach Paris.

Dr. Dickey, while in the land of the head hunters, secured the life of an Indian slain by a venomous snake, and as a reward was presented with a head cured while the explorers were in the territory. Head hunting, the explorers learned, is invariably in retaliation for the kidnapping of women by other tribes and causes all the wars in that district.

The skin of the victim's head is removed entirely and treated for ten days with tannin and hot water. The cured head measures about six inches in diameter. The features are well preserved, and the lips sewn to prevent the escape of evil spirits. The head hunters are not interested in the head of white men.  
 Dr. Dickey, who is a fellow of the Royal Geographic Society, has spent 22 years in tropical South America and is well known as a geographer and explorer.

### The Prince's Doubles

**Several Young Men Who Resemble Heir to British Throne**  
 The Prince of Wales has other doubles than the young American who was recently in London, and whose resemblance to the Prince has caused several misunderstandings. A healthy Parisian not long ago was almost compelled to leave Britain owing to his being mobbed by people who thought he was the Prince.

In South Africa there is a young man who is called "Teddy the Ninth" by his friends. This young fellow is the same height and build as the Prince, and even shares his famous smile.

**Has Unique System**  
 A deaf man has been in the employ of the Galesburg city water department for thirty years. He can tell the position of leaks in water mains by his teeth. He developed a system of placing a key or iron rod on water main, and figuring the location of the leak by the vibrations felt through his teeth.

When a man makes a blunder that he can't blame on anybody else, he doesn't like to talk about it.

A fish diet may not strengthen the brain, but going fishing invigorates the imagination.

Minard's Liniment for Sore Feet

### Predicting Speedy Trans-Oceanic Flights

**Hamburg to New York in 36 Hours Says Aerial Expert**  
 The day when trans-oceanic flights between Hamburg and New York will be made in 36 hours is not far distant, in the opinion of Dr. Edmund Rumpier, noted German aerial expert. Dr. Rumpier has devoted the past five years to the preparation of plans for huge aircraft capable of carrying 1,000 passengers and seven tons of mail.  
 Plans which Dr. Rumpier has evolved for huge aircraft to make the trip call for planes propelled by ten motors of 1,000 horsepower each and capable of attaining a maximum speed of 175 miles an hour.

### Canada Will Extend Business

**Government Voted \$375,000 For Commercial Intelligence This Year**  
 The extension of Canada's commercial intelligence service was discussed in the House of Commons when a vote of \$375,000 for this service during the coming fiscal year was passed. Hon. J. A. Robb, acting minister of trade and commerce, assured the committee that everything would be done to extend business in France and elsewhere.

### SIXTEEN YEARS USE OF BABY'S OWN TABLETS

**Has Shown One Mother There is Nothing to Equal Them**  
 A constant use of Baby's Own Tablets for their children has proven to thousands of mothers that they are without an equal for babyhood ailments. One mother, Mrs. C. W. Jackson, R.R. 1, Gilford, Ont., writes:—"We have used Baby's Own Tablets ever since our first baby was born sixteen years ago. Baby's Own Tablets is the only medicine he has ever had." Baby's Own Tablets are guaranteed to be absolutely safe for even the newborn babe. They are free from opiates and narcotics; act as a gentle laxative on the stomach and bowels and thus relieve constipation and indigestion; break up colds and simple fevers and make baby healthy and strong.

You can get Baby's Own Tablets from your druggist or direct by mail from the Box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Little Helps For This Week

For the vision is yet for an appointed time, but at the end it shall speak, and not lie; though it tarry, wait for it; because it will surely come, it will not tarry.—Hab. II, 3.

Haste not! Rest Not! Calmly wait! Meekly bow the storms of fate! Duty be thy polar guide! Do the right where'er betide! Haste not! Rest not! Confront past, God shall crown thy work at last. Johann Wolfgang von Goethe.  
 "Do not think things." What a grand motto that was! And that was a good motto. "Repos allures." Work here, rest is elsewhere; wipe thy tears; cease thy sighing; do thy work.—Frederic W. Farrar.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Expeller is an excellent medicine to destroy worms.

The Mrs.—"There was nothing shady or green about our family tree."  
 The Mr.—"As long as you speak of your family tree you might mention your bark, too."

A botanist in the Smithsonian Institution has collected 1,200 orchid specimens in Central America.

Tommy Hadn't Heard  
 "Where is the Dead Sea?" asked the teacher of Tommy.  
 "Don't know, ma'am," said Tommy.  
 "Don't know where the Dead Sea is?" Inquired the teacher.  
 "No, ma'am," replied Tommy. "I didn't even know any of them were sick."

### England's King Never Dies

**His Apparent Recedes Title Immediately Sovereign Passes Away**  
 The King of England "never dies." All that is admitted is a "demise of the Crown." The moment the Sovereign passes away, his titles, dignity and power are automatically transferred to the heir apparent, who from that moment reigns in his stead. So, too, just as the King never dies, he is always of full age directly he ascends the throne, whether he has reached his twenty-first birthday or not. In practice, however, a regent is appointed for administrative purposes during his childhood. A species of sanctuary attaches to all royal residences and no kind of judicial process can be lawfully executed in one, except against a criminal or crown debtor. A royal residence is also exempt from rates and taxes so long as the Sovereign occupies it. Thus, Marlborough House is taxed, but Buckingham Palace and Windsor Castle are not. On a "demise of the Crown" members of parliament, judges and naval and military officers are required to take the oath of Allegiance; and cabinet ministers surrender their portfolios.

### Restored To Original Meaning

**Mapping Country From Aeroplane Really "Surveying"**  
 The word "surveyor" has so long been applied almost exclusively to men engaged in running lines and performing other primitive duties of the civil engineer that it is rather amusing to see it restored to its original meaning of one who looks down upon a thing from above. The aeroplane has done it. Canada is mapping much of its hitherto uncharted country from flying machines. The photographs thus taken make, when placed together, a continuous map that tells much more about the country than an ordinary map would show.—Youth's Companion.

**Wretched from Asthma.** Strength of body and vigor of mind are inevitably impaired by the irritation of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dispels the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trust and mental happiness.

Tommy Hadn't Heard  
 "Where is the Dead Sea?" asked the teacher of Tommy.

"Don't know, ma'am," said Tommy.

"Don't know where the Dead Sea is?" Inquired the teacher.

"No, ma'am," replied Tommy. "I didn't even know any of them were sick."

### Coleman Tennis Club Wins The Odd Match at Corbin

The Coleman Tennis Club journeyed to Corbin B. C., on Sunday last and played nine matches against the home club in one of their scheduled inter club games. Coleman players were victorious in five matches while Corbin took four.

The players who made the trip speak in glowing terms of the splendid hospitality dispensed by the club of the B. C. town, and nothing was overlooked to make their visit a most enjoyable one. Corbin even arranged to send a special train to McGillivray to convey the players to Corbin.

The games resulted as follows:—

Corbin	Coleman
Ladies Singles	
Mrs. Hincks	Miss G. Price
Miss Price won 9-7	6-4
Ladies Doubles	
Mrs. Hincks & Mrs. Almond	Miss G. Price & Mrs. Graham
Hincks & Almond won	6-4, 3-6, 6-1
Mixed Doubles	
Mr. & Mrs. Hincks	Miss Price & Barnes
Mr. & Mrs. Hincks won 6-2, 6-2	
D. Grieve & Mrs. Dalton	L. Lindoe & Mrs. Graham
Graham & Lindoe won 6-3, 6-4	
Mens Doubles	
Hincks & Grieve	Barnes & McLeod
Hincks & Grieve won 6-3, 5-7, 4-2	
Waghorn & Frey	Lindoe & Watts
Lindoe & Watts won 6-4, 6-4	
Mens Singles	
R. H. Hincks	L. Lindoe
Lindoe won 3-6, 6-3, 10-8	
D. Grieve	McLeod
Grieve won 6-1, 2-6, 7-5	
P. Waghorn	Watts
Watts won 2-6, 6-1, 6-2	

A Chicago woman wants a divorce after only forty-six years of marriage. Women are so fickle

Mr. Wm. Jewitt left on Saturday night last for Edmonton and upon his return will be accompanied by a life partner.

Miss Gladys Lees has accepted a position as stenographer with the International Coal & Coke Co., Ltd.

Mr. and Mrs. D. E. McLean, 6th street, returned on Monday's local from a vacation spent at Amisk, Provost and other points in Eastern Alberta.

Mr. and Mrs. Ed. Brown returned to Coleman this week and will shortly take up their residence in the house recently vacated by Mr. and Mrs. J. Hollett.

among  
cars in  
its price range!

**In Engineering:** McLaughlin-Buick pioneered the valve-in-head engine; it is the first car to provide the Triple-Seal (Air Cleaner, Oil Filter, Gas Strainer) against dirt, grit and excessive wear.

**In Chassis Construction:** No other car in its price class possesses the Sealed Chassis, with every working part completely enclosed—the Torque Tube Drive and the Cantilever Rear Springs.

**In Performance:** In power, speed and acceleration, McLaughlin-Buick leads in its 75 actual horse-power engine, stands alone. Few cars, at any price, can offer the same ease of driving, steering, starting or stopping.

**In Value:** McLaughlin-Buick's present low prices are a revelation to those who judge its value by its quality.

**In Registrations:** McLaughlin-Buick leads in registrations, all cars in its price range—convincing proof of McLaughlin-Buick's irresistible appeal.

The new low GMAC financing rates are available to purchasers of McLaughlin-Buick on time.
